

Data entry

Send us your content,
we will build your app

start at
\$399

No time for creating your app?

map2app allows our customer to add content in two easy ways.

You can create and manage content into the platform or you can import lists of items as excel/csv files.

If are too busy for doing this by yourself we can do it for you!

How to proceed:

Collect all of your contents in any digital format and send them to us.

We accept Excels files, Word documents and even web pages.

Each app is made up of "items".
An item can be a place, an event or just an article and it can have an address, a text, a starting/ending date, images, audio and video.

We will add your content to your account and create your app!

Price list:

\$399

for the first 50 Items
\$8 for the next items

What is an ITEM?!?

An item - or entity - is the smallest building block of your app.

Once completed, your app will be a list of categories (monuments, hotels, etc.) each category containing a list of items.

An item can be a location, an event or a story.

Each item supports the following fields:

- Title
- Address
- Start date/End date
- Telephone
- Email & Website
- Price
- More
- Description
- Images
- Audio
- Video
